

**Tim Curran**  
**Head of Power US**  
**Senior VP & General Manager**  
**Thermal Products Boilers North America**

Tim Curran is the Country Head of Power for ALSTOM US. He represents the Power Sector President & management team, is focused on Power Strategy in the US, ensures regulation compliance, and the success of Alstom's US employees.

Mr. Curran also holds the title of Senior Vice President, Boilers North America, and is responsible for all business operations. Tim is also responsible for Research and Development, marketing and strategy for the Power Thermal Product lines.

Tim has over 30 years of experience in the Power Equipment and Services business worldwide, having held positions with Combustion Engineering, ABB and ALSTOM across many product lines including development of the alliance business. He also held the position of President & CEO of Gemma Power Systems and VP of Operations with the IPP firm, Reading Energy.

Tim holds a degree in mechanical engineering from the University of Rhode Island.
